

# Fujitsu supporterer SAP HANA™ og opretter globalt democenter

Fujitsu kan nu tilbyde en infrastruktur, der er certificeret af SAP AG og optimeret til at køre SAP HANA™. Løsningen bakkes op af et nyt globalt SAP HANA-democenter.

**Ballerup, den 27. juni 2011** – Fujitsu, der er SAP-partner på verdensplan, tilbyder en platformkonfiguration, der er certificeret af SAP til at køre SAP HANA. Den certificerede platform fra Fujitsu giver kunder en pålidelig, optimeret og skalérbar infrastruktur, som er bygget på high-performance PRIMERGY-servere, ETERNUS-storage og netværksløsninger fra Fujitsu.

Virksomheder, der arbejder med SAP HANA, kan få gavn af en dramatisk forøgelse af hastigheden for databehandling og informationsanalyse i realtid. Fujitsu tilbyder SAP HANA sammen med en omfattende servicepakke, bygget på best-practice, der blandt andet indeholder præinstalleret infrastruktur, integration og jump-start leveringsservice lige som kundesupport under installation, og når løsningen er i drift.

Fujitsu er lige nu ved at etablere et nyt globalt democenter, som supporterer SAP HANA. Formålet er at give enterprise-kunder mulighed for at få et indblik i, hvordan teknologien kan øge deres konkurrencedygtighed. Det globale democenter vil demonstrere, hvordan SAP HANA forbedrer en virksomheds mulighed for at træffe beslutninger i realtid ved at analysere massive mængder af data i serverens hukommelse i stedet for at være afhængig af diskbaserede systemer.

Democenteret, som er placeret i Neckarsulm i Tyskland, kan tilgås remote fra hele verden.

## Om Fujitsu

Fujitsu er en af verdens forende leverandører af it-baserede forretningsløsninger til det globale marked. Med cirka 170.000 ansatte i mere end 100 lande, heraf cirka 400 i Danmark, kombinerer Fujitsu et globalt korps af system- og serviceeksperter og lokalkendskab med meget pålidelige it- og kommunikationsprodukter og avanceret mikroelektronik for at skabe en merværdi for kunderne. Fujitsu Limited er japansk ejet og havde i det regnskabsår, der afsluttedes den 31. marts 2011, en konsolideret omsætning på 55 mia. US\$. # Fujitsu Global Offering in Support of SAP HANA™ Includes New Global Demo Center

**Tokyo, June 27<sup>th</sup>, 2011** – Fujitsu today announces the global availability of Fujitsu infrastructure certified by [SAP AG](#) (NYSE: SAP) and optimized for running SAP HANA™ appliance software, backed by a new Global Demo Center in support of SAP HANA. At the same time, Fujitsu has also completed a major implementation of SAP HANA for customer Mitsui & Co., Ltd.

On a worldwide basis, Fujitsu is one of SAP's technology partners offering a platform configuration certified by [SAP](#) to run SAP HANA, providing customers with a reliable, optimized and scalable infrastructure built on high-performance Fujitsu PRIMERGY servers, ETERNUS storage and network solutions.

By adopting SAP HANA, an in-memory appliance, enterprises can benefit from dramatic increases in data processing speed and real-time information analysis. Fujitsu is providing SAP HANA in tandem with comprehensive services, built on best practices, including preinstalled infrastructure, integration and jump-start delivery services, as well as customer support in both installation and operations through deployment, verification, and application services. For further information on SAP HANA, please see SAP's press release issued today announcing "[SAP HANA is Now Generally Available to Customers Worldwide](#)".

Fujitsu is also establishing a new Global Demo Center in support of SAP HANA to enable enterprise customers to better understand how implementing the technology can boost their business velocity and sharpen their competitive edge. The Fujitsu Global Demo Center will provide real-world scenarios that demonstrate how the use of SAP HANA improves an organization's ability for real-time decision making by analyzing masses of data within server memory instead of depending on disk-based systems.

The Fujitsu Global Demo Center, located in Neckarsulm, Germany, can be accessed remotely from anywhere in the world. It enables customers to familiarize themselves with SAP HANA and map the technology to their individual business needs with the support of Fujitsu's experienced datacenter and application consultants. By showcasing and evaluating how SAP HANA can accelerate and improve business decisions, the Global Demo Center allows Fujitsu and its customers to jointly develop initial ideas for how the advanced technology and Fujitsu consulting can help organizations to accelerate their performance.

## **First major customer implementation of SAP HANA is "live"**

Fujitsu has also successfully supported one of the first major implementations of SAP HANA in a customer's operational environment. Mitsui & Co., Ltd. has completed its technology evaluation and verification of SAP HANA based on the company's evaluation usage policies. In an SAP-certified environment provided by Fujitsu, the company has confirmed the ability of SAP HANA to perform high-speed analysis on mission-critical data.

Mr. Toru Nakajima, Associate Officer and General Manager of Information Technology Promotion Division, Mitsui & Co., Ltd. commented: "To promote the growth of Mitsui's businesses, it is essential to have an IT platform that flexibly adapts to change and supports rapid decision making. The objectives of SAP HANA align with these needs. We greatly value Fujitsu's early leadership in support of SAP HANA as well as Fujitsu's capabilities in providing global support for our IT platforms, and we intend to continue to work with Fujitsu in this area in the future. With the global cooperation from the team at Fujitsu, we have already begun implementing this technology, and look forward to continuing to work with Fujitsu to achieve our mutual objectives."

As a SAP global technology partner, Fujitsu provides a complete infrastructure solution in support of SAP HANA, helping customers get maximum benefit as quickly as possible and helping ensure that the technology is straightforward to use and easy to administer. Comprehensive services, built on best practices, including preinstalled infrastructure, integration and jump-start delivery services, further enhance the power of SAP HANA. Fujitsu also offers customers both proactive and reactive 24x7 support, defined Service Level Agreements (SLAs), and regular system health checks through Fujitsu SolutionContract for the datacenter infrastructure.

## **About Fujitsu**

Fujitsu is a leading provider of information and communication technology (ICT)-based business solutions for the global marketplace. With approximately 170,000 employees supporting customers in over 100 countries, Fujitsu combines a worldwide corps of systems and services experts with highly reliable computing and communications products and advanced microelectronics to deliver added value to customers.
