

## **Huawei selected as future vendor to build TDC's National and Pan-European Optical Transportation Network**

**Copenhagen, 20 June, 2011** - Huawei, a leader in providing next-generation telecommunications network solutions for operators around the world, has been selected by TDC as to build its national and pan-European Optical Transportation Network with Huawei's market leading DWDM solutions. The improved transmission network will enable TDC to provide end users with a better quality of experience of fast growing services that requires high bandwidth, such as High Definition-TV, video conferencing and gaming.

"This agreement is a major milestone in our ambitions to establish a long-term cooperation and partnership with TDC. During the past years we have grown our local organization to meet the needs of operators such as TDC and this contract clearly demonstrates our local ability and that we understand the needs of our customers' challenges. We are delighted to have entered this partnership and are looking forward to working closely together with TDC", says Mr. Zha Jun, President of Network Product Line at Huawei.

"In order to strengthen our market position in transmission of data, telephony, broadband, TV and integrated business solutions we are modernizing and continuing the build-out of long-haul metro and access fibre infrastructure. We have selected Huawei as vendor of DWDM solutions based on their high technology solutions, flexibility and competitive total solution", says Carsten Dilling, Group COO of TDC and continues. "We are pleased to welcome Huawei as a future strategic network partner in our continued effort to build out and maintain networks with the highest quality in a highly cost efficient manner".

Huawei currently holds the no1 position in DWDM solutions globally. In the scope of the contract, Huawei will deliver end-to-end solutions through its widely deployed NGWDM series, including Access, Metro and Long Haul DWDM. TDC's pan-European network stretches through Northern and Western Europe, including cities such as Helsinki, Stockholm, Oslo, Copenhagen, Amsterdam, Frankfurt, Paris and London. The improved Optical Transportation Network will enable TDC to meet future demands of network

evolution to support business expansion, improving operational performance and meeting cost targets. Huawei will initiate the delivery of the 6-year contract in 2011.
