---

Copenhagen Co'creation is created by Danish Design Association in collaboration with the Danish Chamber of Commerce and the Confederation of Danish Industry, Danish Design Week/ Danish Design Centre and INDEX:

---

Copenhagen Co'creation is part of the program for user-driven innovation administrated by Danish Enterprise and Construction Authority, which is part of the Ministry of Economic and Business Affairs. Denmark is the first country to make user-driven strengthening a national priority.

---

The Danish Design Association (DDA) is the trade association for the Danish design companies. We work to aid the development and internationalization of the design business in Denmark. In addition to representing design companies' interests, the DDA creates national and international networks and develops resources and tools.
