

Mobile De-Watering Unit

MOBILE DE-WATERING UNIT FOR DISASTER AREAS

Climate changes increase the risks of floods worldwide and driven by the immense economic impact caused by this natural disaster, stakeholders within the industry focus on decreasing the damages and on re-establishing the infrastructure as fast as possible.

Ellehammer's de-watering unit is a scalable diesel driven solution, developed together with key-stakeholders in the industry to fulfill the needs and requirements of customers.

FEATURES

- Diesel driven high-capacity pump
- Capacity: 700 m³/hr @ 2 bar
- Hatz diesel engine
- 3500 kg trailer
- Simple push buttons
- Height adjustable draw-bar
- Locked engine cabin
- Safety coupling

BENEFITS

- Easy to operate
- Fail safe operation
- Heavy duty for harsh conditions
- Secure engine area
- Sheltered work area with lighting
- Reduced noise
