

Round window (project solution):

- glass is glued to the steel construction,
- external sealant for tightness.

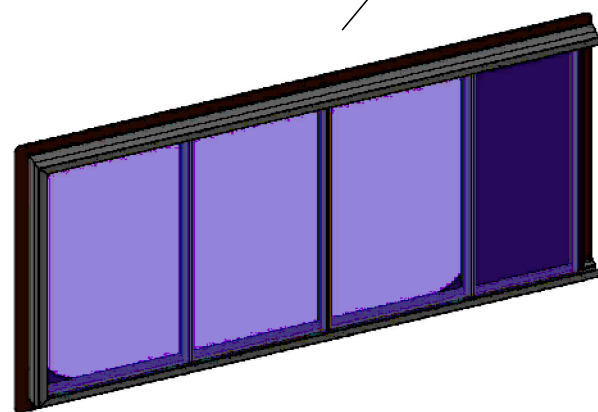

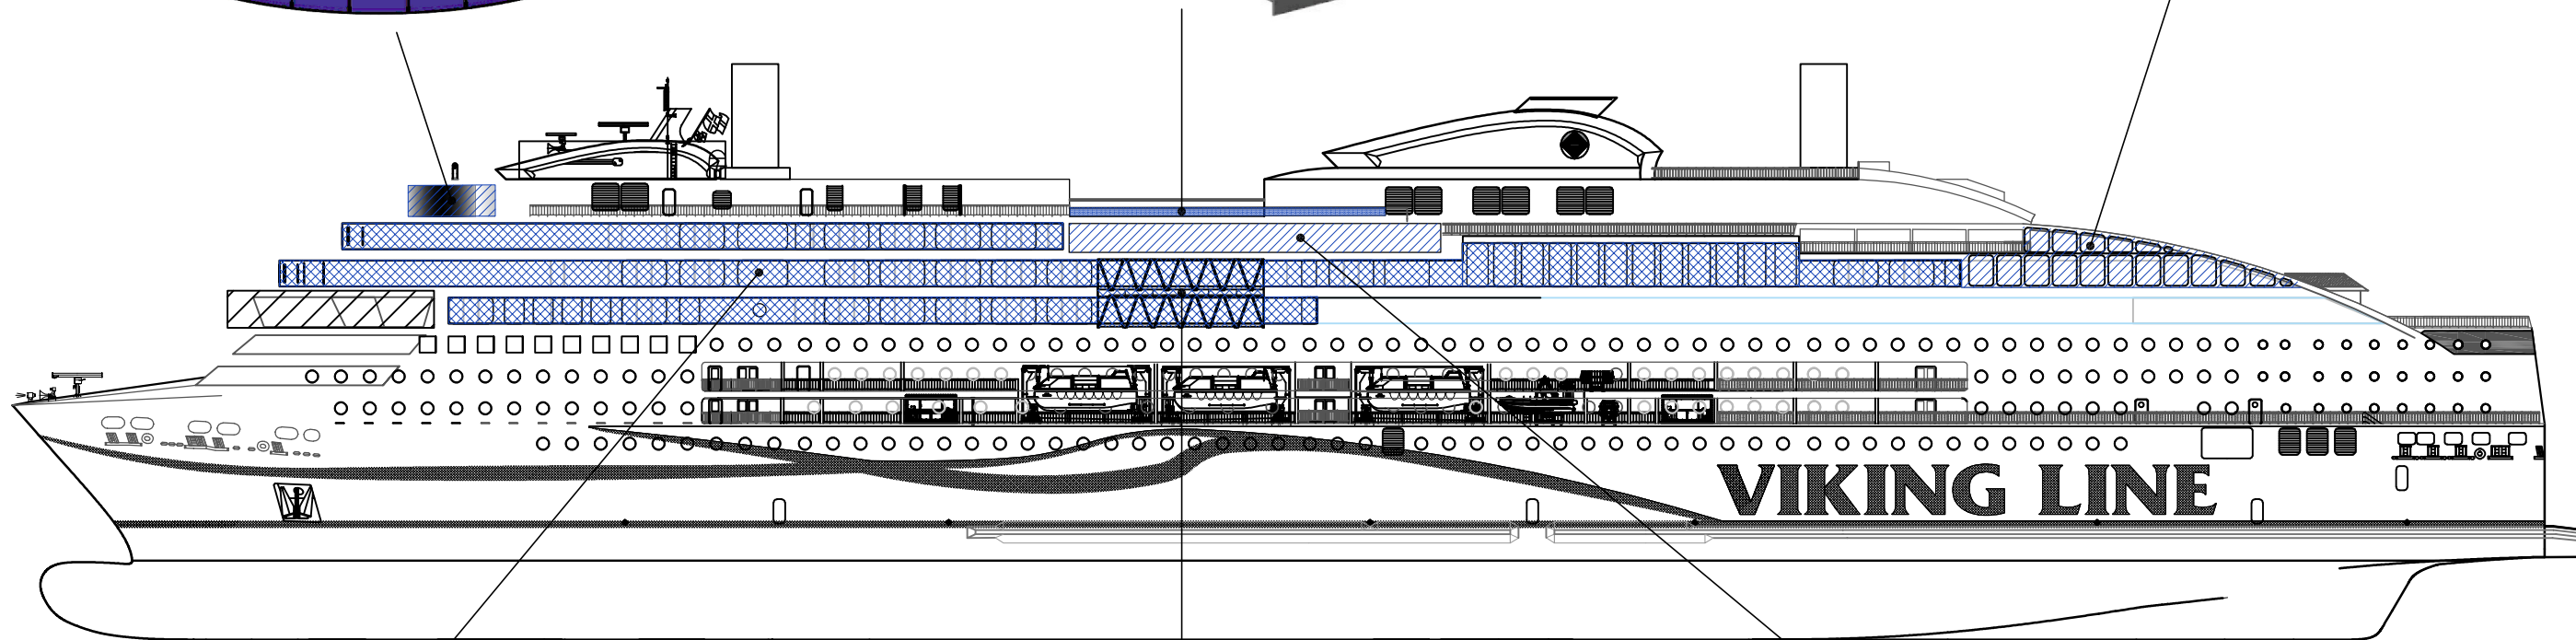

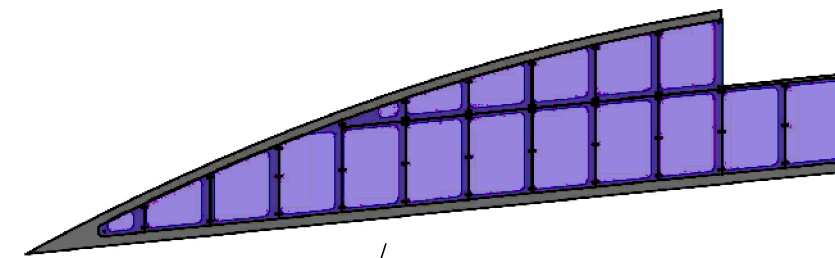

Lightweight aluminium glass roof:

- Frames are prepared in workshop conditions,
- Reliable solution with internal and external glazing gasket,
- No "silicone" job at all.

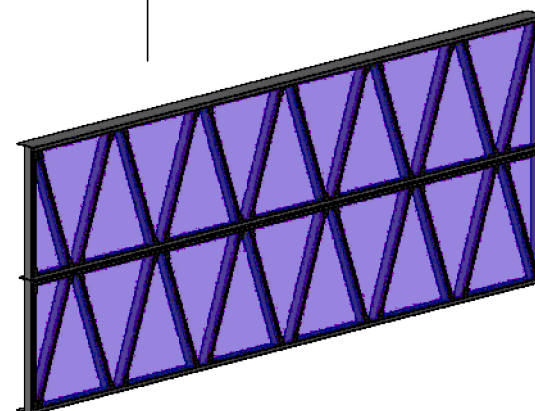

Spider mount window (project solution):

- glass with holes delivered by glass supplier,
- stainless steel spider mounts to fix glass to the bulkhead,
- external sealant for tightness.

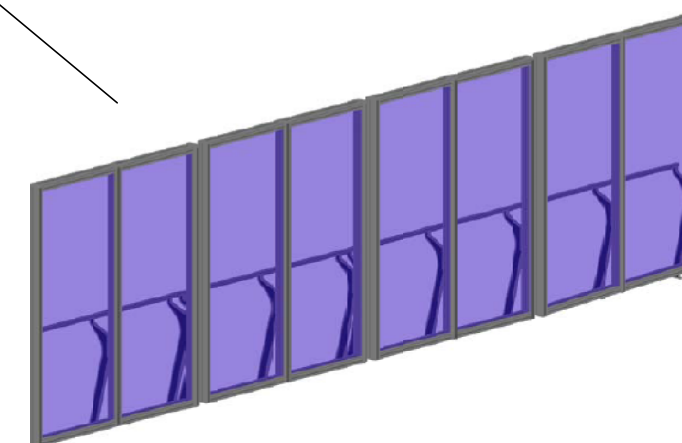

Lightweight aluminium special window:

- Frames are prepared in workshop conditions,
- Reliable solution with internal glazing gasket instead of gluing glass,
- Less "silicone" job better inside view,
- Glass is safely kept by aluminum frames without additional mechanical pieces or caps,
- Glass edges covered and protected by aluminum frames,
- Reliable and tested drainage system.

Triangular windows (project solution):

- glass is glued to the steel construction,
- external sealant for tightness.

Lightweight aluminium windscreen:

- Frames are prepared in workshop conditions,
- Reliable solution with internal and external glazing gasket,
- No "silicone" job at all.
